PROFESSIONAL EXPERIENCE

Front Desk & IT Operations Support

The Kyaka Hotel

02/2025 – 12/2025 | Machakos

Aided day-to-day use of the hotel booking and reservation system, maintaining accurate records and smooth guest check-in and check-out operations.

Provided first-line troubleshooting for minor system and equipment issues, including POS systems, printers and internet connectivity, helping reduce operational downtime.

Helped colleagues in using workplace systems, improving confidence and efficiency in daily operations.

Maintained accurate and confidential electronic records and supported the preparation of reports from booking-system data for management decision-making.

ICT Officer

Office of the Governor

01/2023 – 04/2024 | Machakos

Maintained and provided technical troubleshooting and support for internal stakeholders.

Provided hands-on support in networking and ICT hardware optimization.

Implemented UI/UX improvements that enhanced the usability of web interfaces.

Used Git to manage collaborative version control for web-related projects.

Freelance

Freelance / Collaborative Projects

2020 – Present | Remote

Designed and developed responsive web applications using modern front-end and back-end technologies.

Implemented user authentication and data-management functionality in collaborative projects.

Debugged and resolved technical issues to support stable system performance and user experience.

Worked with cross-functional collaborators to deliver user-focused technical solutions.

ICT Intern

Machakos Level 5 Hospital

04/2021 – 06/2021 | Machakos

Resolved technical issues involving the Hospital Information System and supported users with system-related needs.

Configured and maintained ICT hardware to support reliability and performance.

Generated reports to support operational decision-making.

PROFESSIONAL SUMMARY

IT and ICT support professional with hands-on experience supporting users, troubleshooting systems and equipment, maintaining web-based systems, and assisting with networking and ICT hardware. Experience includes end-user support for POS systems, printers and internet connectivity, technical troubleshooting for internal stakeholders, and ICT hardware support in public-sector and healthcare environments. Currently pursuing a Bachelor's degree in Information Technology and backed by a Diploma in ICT, AWS re/Start training, and software engineering experience.
